

YOUR NOTEBOOK / START HERE

YOUR AI NOTEBOOK STARTS HERE

Everything you need is in this folder.

Take a little look ahead before we meet. Preparation is optional.

1 OPEN YOUR NOTEBOOK

Open Relationship-Notebook.html in a web browser on your computer. Prefer paper or a simple phone preview? Open the Print folder, then Client-Preview-Notebook.pdf.

2 LOOK AHEAD, AT YOUR OWN PACE

Choose "Open my notebook." Read the nine questions, jot down thoughts, or leave them blank. Skip, combine options, or use your own words.

3 SAVE BEFORE YOU CLOSE

If you type notes, choose "Pause & save," then "Download my notebook." To return later, use "Pause & save," then "Open a saved notebook." Notes do not save automatically.

4 BRING IT TO OUR SESSION

Bring only the notes or handwritten pages you want to share. Together, we'll use "Start in my AI chat," then "Copy for my AI chat," paste it into the agreed AI chat, and review the settings it proposes.

Keep private: leave that answer out of the files or photos you share. In the HTML notebook, "Keep private" clears that answer and excludes it from future saves and handoffs.

The folders hold optional printouts and reference materials.

Start with the HTML notebook; explore the folders only if needed.
